

Boby Kumar

Full-Stack / Backend Developer

Delhi, India · +91-7210669792 · bobykumar.info7@gmail.com · github.com/bobykumar7210

PROFESSIONAL SUMMARY

Backend-focused Full-Stack Developer with practical experience building web applications and APIs using JavaScript, Node.js, Express, React, and modern backend technologies. Strong understanding of asynchronous programming, Event Loop, REST APIs, authentication, database design, testing, and production-oriented development.

TECHNICAL SKILLS

Languages: JavaScript

Frontend: React

Backend: Node.js, Express.js, NestJS, REST APIs, GraphQL, WebSockets

Databases: MongoDB, Redis

DevOps / Cloud: CI/CD, Docker, AWS, Hostinger, Vercel, Firebase

PROFESSIONAL EXPERIENCE

Freelance / Subcontract Software Developer

2021 - Present

- Developed and maintained web applications and backend services, translating business requirements into reliable, maintainable features.
- Built REST APIs with Node.js and Express.js and integrated frontend applications built with React and Next.js.
- Worked with MongoDB and database concepts including CRUD operations, aggregation, indexes, and query optimization.

PROJECTS

Full-Stack Web Application — Online Marketplace Platform (Backend + Admin)

Node.js, Express, GraphQL, MongoDB, React, Docker

- Developed a modular GraphQL API (users, listings, chat, payments, moderation) on Express and MongoDB, with JWT auth and resolver-level authorization.

Real-Time Application — Node.js, WebSockets / Socket.IO, React

- Designed Socket.IO rooms mapped 1:1 to database chat IDs; users join all rooms on connect and leave only their own socket on disconnect.
- Delivered real-time messages, presence, and delivery status with NestJS/TypeScript; Redis adapter for multi-instance fan-out and FCM when users are offline.

EDUCATION

Bachelor of Computer Applications (BCA)

Jamia Humdard University, India

2014 - 2017

CORE STRENGTHS

Backend API Development · **Problem Solving** · **Debugging** · **Testing** · **Clean Code** · **Full-Stack Collaboration**
